

## Press Coverage

### Evening Standard – Floorplan May 2005

#### Designs on DIY

If you have trouble visualising your interior design ideas, then a new software package may help. Floorplan 3D Interior Design is a set of “tools” that can draw up anything from a single room to a complete self-build.

You start by choosing from the hundreds of pre-drawn floor maps — “dragging and dropping” walls to create a basic plan, and adding detail from the 1,800 fixtures and fittings (sofas, cookers, beds, sinks etc).

Then, using the latest in virtual-reality technology, you can view and walk through the design in full 3D, moving furniture, changing colours and adding textures to suit. Lastly, you print off a photo-quality image.

Floorplan costs £29.99 at PC World and is also available from [www.floorplan.tv](http://www.floorplan.tv). Call 0800 289041.
